Multi-functional Hemorrhage Control

Abdominal

The AAJT-S compresses the abdominal aorta when applied at the mid-abdomen to control bleeding in the pelvis, groin and legs.

Axilla

Inguinal

The AAJT-S can be positioned to stop bleeding for left or right lower leg hemorrhages.

Pelvic Fractures

The AAJT-S is cleared to stabilize the pelvis and can reduce the size of the abdominal cavity.

Zone 3 - REBOA

The AAJT-S has been proven to be equivalent to Zone 3 REBOA* when applied at the mid-abdominal level.

Easy to Use - Wide Coverage Area - Multi-Purpose

• 5 Steps To Success •

1. Secure device around torso. Connect ladder strap until **RED** meets **RED**.
2. Position bladder over target site.
3. Tighten belt and remove all slack.
4. Use ratcheting buckle to complete tightening.
5. Inflate bladder until **GREEN** indicator shows.
